MSCI EMERGING MARKETS SRI, a Subfund of the SICAV BNP PARIBAS EASY

Class "UCITS ETF EUR Distribution" - ISIN code LU1659681313

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group

Objectives and Investment Policy

The Fund seeks to replicate (with a maximum tracking error* of 1%) the performance of the MSCI Emerging Markets SRI (NTR) Index (the «index») by investing in a substitute basket, composed of, inter alia, shares of companies, debt securities or cash (synthetic replication).

When investing in a basket of securities called substitute basket the performance is swapped with the performance of the index, generating counterparty risk.

*The tracking error is a risk indicator that measures how closely a fund tracks the performance of its reference index.

A dividend may be distributed.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

- Historical data may not be a reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?

The risk category is justified by the investment in emerging markets that are likely to be subject to a higher than average volatility due to a high degree of concentration, greater uncertainty because less information is available, there is less liquidity, or due to greater sensitivity to changes in market conditions (social, political and economic conditions).

- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Liquidity Risk:** This risk arises from the difficulty of selling an asset at a fair market price and at a desired time due to lack of buyers.
- **Counterparty Risk:** This risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.
- **Derivatives Risk:** When investing in over the counter or listed derivatives, the Fund aims to hedge and/or to leverage the yield of its position. The attention of the investor is drawn to the fact that leverage increases the volatility of the subfund.

For more information on risks, please see the "Investment risks" section of the Fund's prospectus, which is available at www.bnpparibas-am.com.
