Lyxor Euro Overnight Return UCITS ETF - Acc (the "Fund")

ISIN: FR0010510800 - Sub-fund of the MULTI UNITS FRANCE investment company (the "Company") domiciled in France.

Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Investment objectives and policies

The Fund's management objective is to replicate, both upwards and downwards, the performance of the Solactive Euro Overnight Return Index (gross dividends reinvested) (the "Benchmark Index"), representing the return on deposits remunerated at the interbank overnight rate, while minimising the tracking error between the Fund's performance and that of the Benchmark Index as much as possible. The anticipated level of tracking error under normal market conditions is indicated in the Fund's prospectus.

The Fund seeks to achieve its objective via indirect replication, through OTC swaps (futures).

The Fund may invest in a diversified portfolio of international debt securities, the performance of which would be swapped against that of the Benchmark Index.

At least 60% of the value of the Fund's assets corresponds to balance sheet assets with a residual maturity of two years or more.

Further information about the Benchmark Index can be found on the Solactive AG website (www.solactive.com).

The net asset value is also indicated on the Reuters and Bloomberg pages of the Fund and may also be stated on the websites of stock markets where the Fund is listed.

The share currency is the Euro (EUR).

Risk and return profile

The risk and return category given above is based on the historical performance of the Fund's component assets or the performance of its benchmark index or the simulated performance of a portfolio model. As such, this risk estimation cannot be a reliable indicator of future risk, and it could change over time. The lowest category does not mean a risk-free investment. The Fund has been classified as category 1 given its exposure to the Benchmark Index. Category 1 indicates that loss of capital is possible, but extremely unlikely under normal market conditions.

The significant risks for the UCITS not taken into account in the above-mentioned indicator and which could result in a decrease in the Fund's net asset value and which the Fund is authorised to include in this document (see the Risk Profile section of the prospectus for more information concerning the risks):

- **Counterparty risk:** The Fund is exposed to insolvency risk or any other type of default of any counterparty with which it enters into an agreement or transaction, particularly in the case of OTC futures or temporary sales of securities. Such an event could result in a significant decrease in the Fund's net asset value. In accordance with the regulations applicable to the Fund, this risk may not exceed 10% of the Fund's total assets for a specific counterparty.
- **Risk associated with the use of derivative instruments:** The Fund may use financial contracts that entail various types of risks, including but not limited to leverage, high volatility, valuation, or liquidity risks.
- **Credit risk:** The Fund is directly or indirectly exposed to the risk of insolvency or any other type of event having an impact on the credit quality of one or more of the issuers of the securitised debt. The materialisation of this risk or these events could result in a drop in the net asset value of the Fund.
