

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Invesco S&P 500 VEQTOR UCITS ETF (the "Fund") A sub-fund of Invesco Markets III plc (the "Umbrella Fund") Dist (ISIN: IE00BX8ZXS68) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

Objectives and Investment Policy

- The Fund is an Exchange Traded Fund. This means shares in the Fund are listed and traded on one or more stock exchange(s).
- The objective of the Fund is to generate capital growth and income which would correspond to, or track, the return on the S&P 500 Dynamic VEQTOR Index (Net Total Return) in USD (the "Index")¹ by replicating all of the constituents of the Index.
- An index measures the performance of a selection of instruments representative of the overall market or subsection of it.
- The Fund aims to achieve its objective by providing investors with broad exposure to the U.S. equity market while also intending to partially reduce potential losses in that market.
- The Index dynamically allocates between three components: an equity component represented by S&P 500 Index; a volatility (price fluctuations) component represented by the S&P 500 VIX Short-Term Futures Index; and a cash component.
- The Fund will invest, in line with the Index, a greater portion of its assets in the equity component during periods of low volatility and a greater portion of its assets in the volatility component during periods of increased volatility. The volatility component will not exceed 40% of the Fund's assets.
- If losses in the Index are greater than or equal to 2% during the previous five business days, the Fund, in order to replicate the Index, will move its entire allocation to money market funds, money market instruments and/or cash. Futures contracts may also be used to reduce exposure to the U.S. equity market. The Fund will move back to dynamically allocate between the equity and volatility components as soon as losses on the Index are less than 2%.
- To achieve the objective the Fund, will as far as practicable, gain exposure to all the instruments in the Index in their respective weighting. The Fund may, in limited circumstances, hold shares that are not part of the Index in order to meet the objectives of the Fund.
- You can buy and sell shares in the Fund on any Business Day (as defined in the Prospectus).
- Any income from your investment will be paid quarterly.

Risk and Reward Profile

- The Share Class is in risk category 4 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- **General Investment Risk:** The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- **Concentration of risk:** The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified.
- **Equity Risk:** The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at etf.invesco.com (select your country and navigate to Product/Prospectus).
